BASIC COMPUTING PROJECT SEMESTER FOR LAW

1. Analyze the key provisions of the Ugandans Agreement and discuss its impact on Uganda's political landscape in the early 20th century.
2. What are the key steps involved in conducting effective legal research? How do these steps help in building a strong case?
3. How can technology and online databases improve the legal research process? What are some popular tools used by legal professionals?
4. Why is it important for a lawyer to understand the audience during oral advocacy? How can this understanding influence their presentation style?
5. What is an exclusion clause, and what purpose does it serve in a contract? Under what circumstances might an exclusion clause be deemed unenforceable?
6. Discuss the principle of "innocent until proven guilty." Why is this principle fundamental to the criminal justice system?
7. Discuss how technology can help law enforcement and prosecutors identify different modes of participation in a crime. What tools or methods are commonly used in investigations?
8. Discuss how the structure of the court hierarchy can affect the delivery of justice. What are the benefits and challenges of having multiple levels of courts?
9. Evaluate the policies and impact of Idi Amin's government on Uganda. How did his leadership affect human rights, the economy, and Uganda's international relations?
10. Discuss the significance of the 1902 Orders in Council in shaping British colonial governance in Uganda. What changes did it introduce, and how did these affect local administration?
11. Describe the law-making process in your jurisdiction. What are the main stages, and how do public consultations play a role in shaping new laws?
12. Explain the court hierarchy in your legal system. How does this hierarchy affect the appeal process and the interpretation of law?
13. How can digital evidence be used to establish the modes of participation in a crime? Discuss the role of technology in gathering and presenting this evidence in court.
14. How can technology, such as online databases and legal research tools, enhance the understanding and application of criminal law? What are the benefits of using these technologies for legal professionals?

All the activities herein should be a blend of Visual, audio and physical presentations. Mainly suited as group projects with individualized input. Each group should create a shared folder on the cloud and have the following output at the end of the semester ➤ Word document ➤ Prepare a presentation ➤ Visual display of their work (for the online audience) using any of these (a flyer, or poster, video or audio clip
